Education

The University of Texas at San Antonio

Aug. 2022 – May 2026

Bachelor of Science in Computer Science, Minor in Mathematics

GPA: 3.90 (Major: 3.88)

– **Awards:** Distinguished Presidential Scholarship, President’s List, Dean’s List, Reboot Scholarship

– **Relevant coursework:** Data Structures, Systems Programming, Algorithms, Databases, Architecture, Web Technologies, Software Engineering, Data Science, Artificial Intelligence, Developing AI tools for K-12

Technical Skills

Languages: Java, Python, C, SQL (MySQL), HTML/CSS, JavaScript, PHP

Developer Tools: GitHub, AWS, VS Code, Dreamweaver, Workbench, Eclipse, Android Studio, Jupyter Notebook

Libraries/Frameworks: Pandas, NumPy, GeoPandas, Streamlit

Experience

Computer Science Grader - UT San Antonio

Aug. 2025 – Present

- Evaluated programming assignments and exams for introductory computer science courses.
- Provided detailed feedback to help 40+ students on code correctness, efficiency and programming style.
- Collaborated with the instructor to ensure consistent grading standards across sections.

Computer Science Tutor - UT San Antonio

Sep. 2023 – Dec 2025

- Tutored students one-on-one or in small groups in Python, Java, and C programming.
- Explained core CS concepts and debugging strategies for coursework and projects.

H-E-B Community Innovation Scholars Intern

May 2025 – Aug. 2025

- Analyzed 4M+ SACRD platform records to identify food and service gaps at ZIP code level.
- Developed a Gap Score metric quantifying mismatch between food demand and availability.
- Performed trend analysis to uncover disparities in food access and inform resource allocation.
- Delivered findings through poster presentation and stakeholder briefing with SACRD and United Way.

Undergraduate Research Assistant - UT San Antonio

Oct. 2024 – Aug. 2025

- Developed and troubleshoot containerized workflows with Docker, improving reproducibility.
- Collaborated within the iSense project team to provide technical and analytical support.

Projects

Smart Attendance System | Python, OpenCV, MediaPipe, Flask, SQLite

Oct. 2025

- Built an AI-driven face recognition system achieving 92% accuracy.
- Automated attendance marking using real-time MediaPipe detection, reducing manual effort by 85%.
- Trained a Random Forest model with confidence-based verification to prevent duplicate logs.
- Designed a Flask dashboard with Chart.js for analytics and CSV export.

Food Access Gap Analysis | Python, Pandas, Streamlit

Aug. 2025

- Cleaned and merged 12 months of datasets (~ 4M rows) for analysis.
- Applied statistical analysis to identify underserved ZIP codes using a “Gap Score” metric.
- Built an interactive Streamlit dashboard visualizing key findings.

Job Application Management System | Python, SQL, Workbench

May 2024

- Developed a platform for employers to manage job applications and for applicants to track progress.
- Used Python to generate structured synthetic data for SQL tables.
- Implemented tracking, interview management, and real-time updates.

Activities and Leadership

RowdyHacks XI - Media and Logistics Organizer

Apr. 2025 – Oct. 2025

- Coordinated event logistics while designing promotional visuals and digital content for 300+ participants.

Qualcomm Student Accelerator - San Diego, CA

Sept. 2024

- Competitively chosen for Qualcomm’s global student accelerator program focused on innovation, technology, and leadership development.

Code Quantum Hack Day - Logistics Organizer

Oct. 2024 – Apr. 2025

- Coordinated food and logistics operations for 50+ participants during the CQ Hack Day event.
